

# HEALTHCARE & SUSTAINABLE DEVELOPMENT

## In 10 years time... It will be too late!!!

- ★ 80% of the world's production is consumed by 20% of the population
- ★ Hospitals are "pollution factories"
- ★ We need to act now: unite and together do something concrete

Acting in order that "HPH net" can become a way of educating staff and clients to develop or modify their own habits and behavior towards sustainable development

## ACTING TOGETHER BECAUSE OTHER WAYS ARE POSSIBLE
