The 17th century's hospital

The hospital mirrors the degree of humanity in society

A young female medical doctor

- 1960 born
- 1974 mixed cellularity Hodgekin's disease (MCHD) stage III B
→ splenectomy, high dose **radiotherapy**
- 1975 **pericarditis with effusion**, conducting disturbances
- 1985 third-degree AV Block → permanent **pacemaker**
- 1987 right side **pleural effusion, constrictive pericarditis**
- 1988 **encased heart** → cardiac decortication

Side effects of the oncological therapy:

- hypothyroidism
- hypogonadism
- amenorrhoe

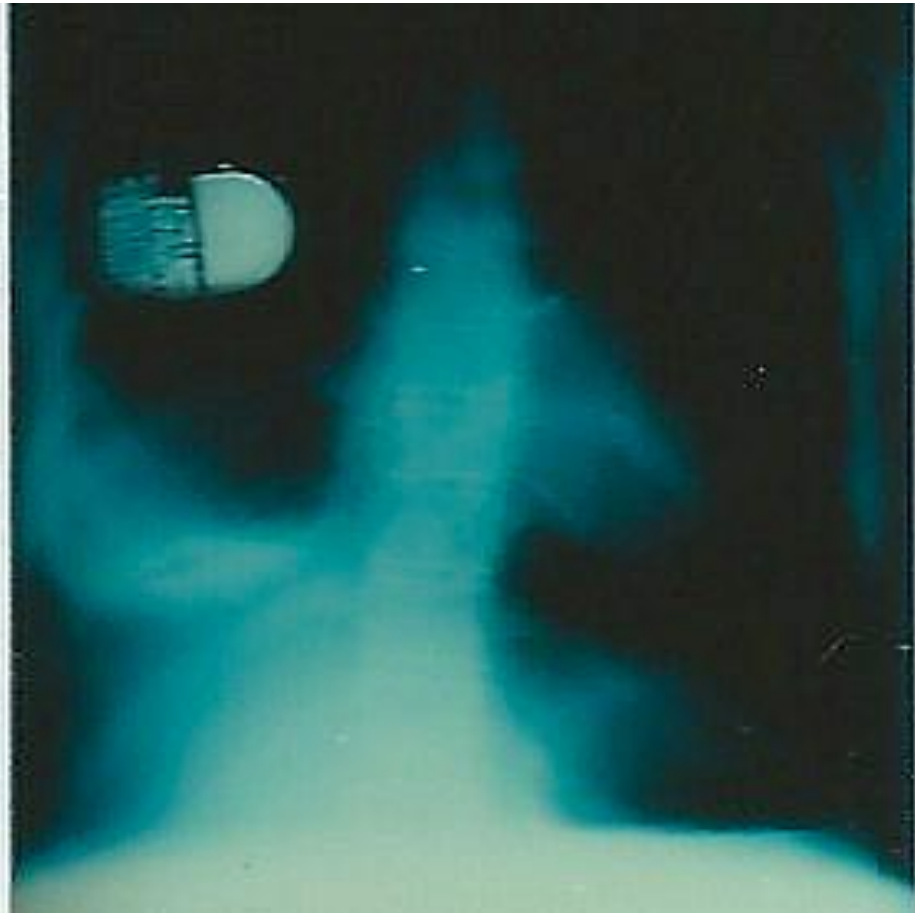

Stage III : Involvement of lymph node regions on both sides of the diaphragm, which may also be accompanied by involvement of the spleen

B: Fever ($> 38^{\circ}\text{C}$, drenching night sweats, unexplained loss of body weight within the preceding 6 month $> 10\%$)

pericarditis with effusion

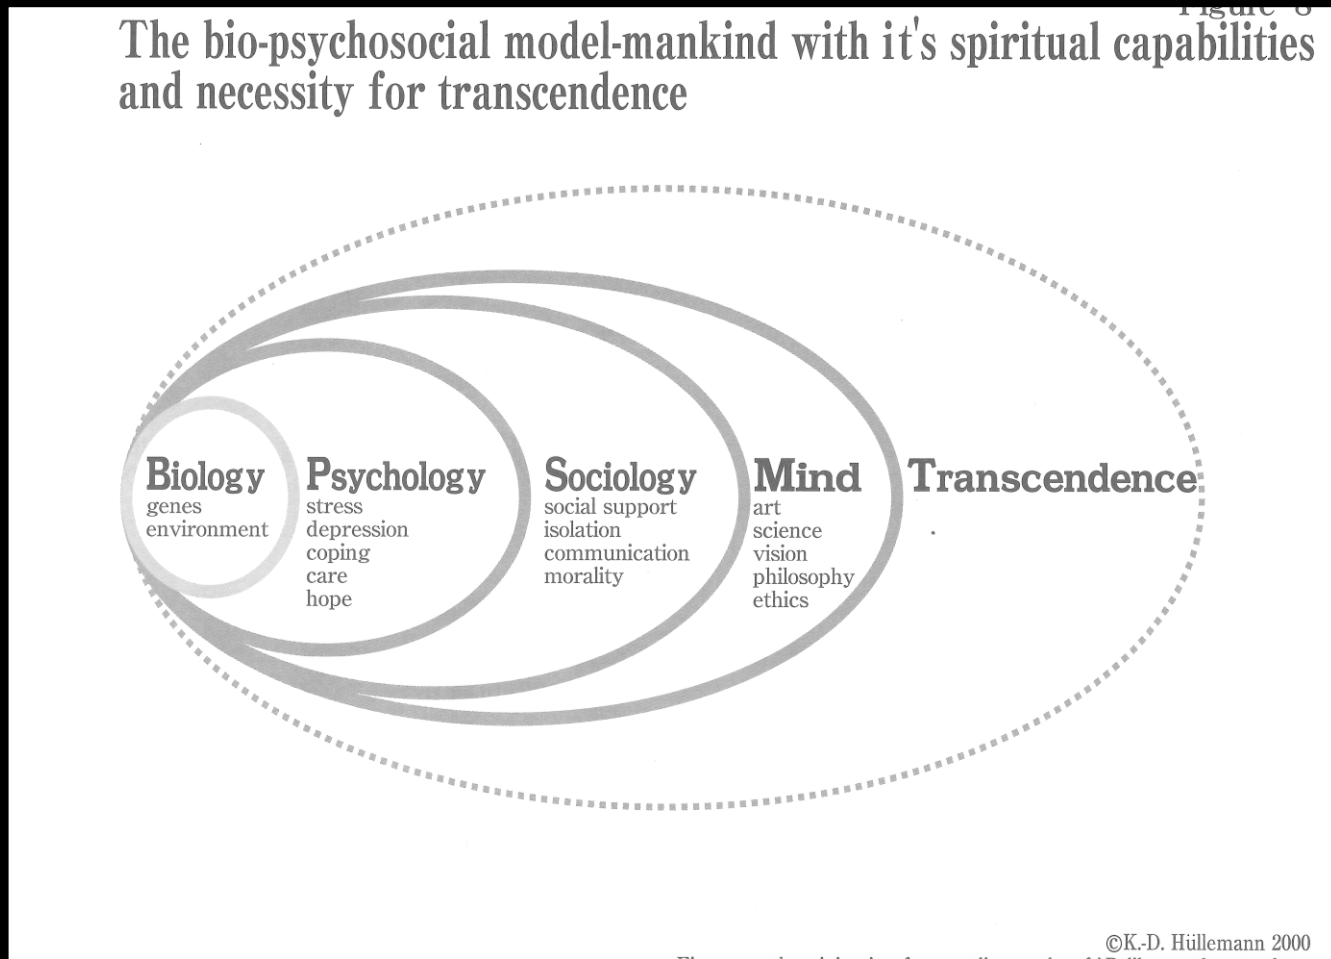

constrictive pericarditis

cardiac decortication
