

Department of Nephrology in a certain district promotes SDM effectiveness ~ Taiwan experience

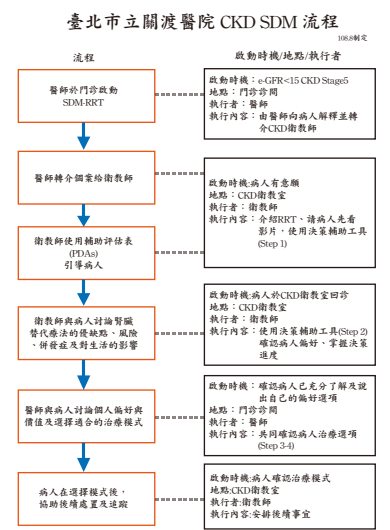

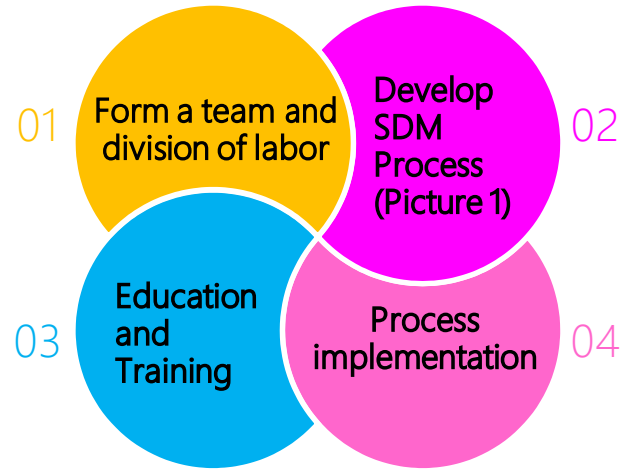

Wan-Yi Tsai¹ / YA-CHU, TSAI² / Wen Ching, Sung³ / I-Ter, Chang⁴

Background

In response to the Ministry of Health and Welfare's SDM as "the annual goal of medical quality and patient safety", in order to practice the spirit of SDM, patients can participate in medical decision-making, so the hospital's nephrology department promotes SDM activities to promote medical communication.

Methods

Pictrur1. SDM Process

Results

1. In the CDK Stage5 case, 37 people were initiated by the physicians and referred to the teachers for interviews.
2. Three SDM advocacy lectures were held for the chronic kidney disease group (picture2).
3. The patient using the paper tool is about 18 people, and the film (picture3) + paper tool (picture4) is about 19 people.
4. Participated in the medical strategy meeting SDM practice activities to win the award.

Discuss

Taiwan is a dialysis kingdom. It should be guided early. Maybe it can be intervened in the third phase. With SDM, patients can choose their own measures to prevent disease progression, so as to improve the quality of life of patients, prevent diseases and reduce unnecessary medical expenses.
